» More intelligent printing

- Simplify document distribution
- Improve printer management
- Create a more reliable print environment
- Save time with unique printing options
- Increase efficiency with smart printing features

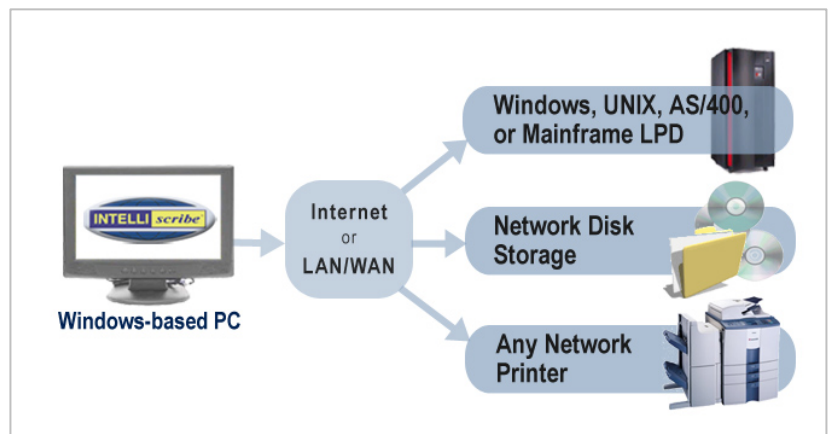

» What can INTELLI*scribe* do for you?

- **Business Offices** with multiple locations across the country are using broadcast printing to distribute reports to users at each location.
- **Universities** are using round-robin printing with multiple, inexpensive network printers to more evenly distribute print loads among printers and to minimize downtime.
- **Warehouses** are using fail-over printing to ensure that important reports are printed.
- **Offices** are using destination-balancing to even out printer usage among multiple printers so a single printer is not overused and so ink and toner replacements will happen at closer to the same time.
- **Data Warehouses** are using INTELLI*scribe's* reprint abilities to reprint one-time reports and queries that have been previously generated.
- Read more about **newsroom script printing** on the following page.

INTELLI*scribe* gives you more printing options to save time and money, simplify printing processes, and manage your printers. **What can INTELLI*scribe* do for you?**

INTELLI*scribe* brings you new options for printing documents and gives you the power to intelligently manage printers. Powerful, flexible, and easy to use, INTELLI*scribe* is the perfect tool to get more from your printing.

Once set up on a Windows[®]-based workstation or server, printing with INTELLI*scribe* is just like routine Windows printing: select the INTELLI*scribe* printer you would like to print through, and click *Print*. And now included standard with INTELLI*scribe*, the Shared Print Activator (SPA) feature can transform INTELLI*scribe* into a powerful print server, allowing other network users access to its print features.

Basic INTELLI*scribe* Workflow

» Technically speaking...

INTELLI scribe is a powerful LPR print client that supports the LPR/LPD and HP JetDirect® protocols. As a TCP/IP print client, INTELLI scribe spools and prints data to any networked printer, print server, Windows LPD, UNIX LPD, or iSeries™/ zSeries® LPD.

» System Requirements

Supported Desktop Platforms:

- Windows 2000 / XP / Vista / 7

Supported Server Platforms:

- Windows Server 2003 through 2008 R2

Other Requirements:

- Internet Explorer 5.01 SP2 or later
- TCP/IP network

» INTELLI scribe in the Newsroom

Newsrooms are using INTELLI scribe's broadcast printing function alongside their newsroom systems (iNEWS™, ENPS®, and others) to easily print scripts simultaneously to multiple network printers (see diagram). In many cases, these printers are loaded with specific colored stock for different people.

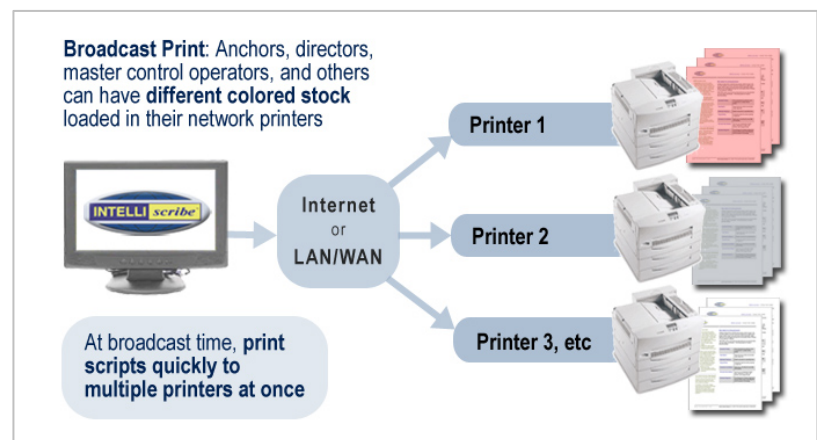

INTELLI scribe is also supported in a Windows cluster environment which provides increased fail-over delivery for unparalleled print reliability. If hardware fails on one node in a cluster, the jobs are printed by the next configured node in the cluster.

With INTELLI scribe, script printing and distribution are simple and inexpensive. Newsrooms and broadcast companies can install INTELLI scribe and immediately simplify the script printing process. Read more about [news script printing](#) with INTELLI scribe.

MORE OPTIONS for PRINTING DOCUMENTS Printing your documents in powerful ways just got a whole lot easier: Click *Print* once and have your news script sent simultaneously to multiple network printers; reprint a copy of your sales forecast without opening the original application; print packaging information from your business office in Portland to your warehouse in Spokane.

With INTELLI scribe, you can print your documents how you want and where you want, quickly and efficiently. The following options will improve document printing:

Broadcast Printing	Print a document once and have it sent simultaneously to multiple network printers.
Easy Reprint	Reprint documents without launching the original application.
Destination Selection	Reprint a document to a specified printer.
Drag and Drop	Send printer-ready files without launching an application.
Command Line Interface	Submit one or more files from any folder with ISendFile.
Advanced User Interface	View port, job, and destination details; query a destination for status, track activities, and manage print jobs.
Seamless Integration	Print efficiently from Windows applications because INTELLI scribe is fully integrated with the Windows Print Manager.

Typical Newsroom Script Printing Setup

» INTELLiscribe Pricing and SUM

INTELLiscribe is priced per computer. Each computer one which the software is installed must have its own license.

Pricing per license:

- \$295 commercial
- \$177 government and education
- Volume discounts are also available. Contact a sales representative at Brooks for more information.

One year of Software Upgrade Maintenance (SUM) is automatically included in the INTELLiscribe price. The annual renewal rate for INTELLiscribe is 18% of the current price of the software.

SUM includes 12 months of product upgrades and 12 months of technical support.

MORE INTELLIGENT PRINT ENVIRONMENTS In addition to giving you more document printing options, INTELLiscribe helps you achieve better printer utilization and establish more reliable print environments: distribute documents automatically between your office laser printers; print to any IP-addressable printer; dynamically discover printers on your network. The following options will help you get more from your printers and print environment:

Fail-over	Reroute print jobs automatically to another printer if the specified printer fails.
Round Robin	Print documents in turn to a sequence of printers.
Destination Balancing	INTELLiscribe maintains statistics on the amount of data sent to each printer, and automatically sends new documents to the least used printer.
Service Location Protocol (SLP)	Allows for dynamic discovery of destinations on a network.
Protocols Supported	INTELLiscribe supports the LPR/LPD and HP JetDirect protocols.
Platform-independent Targets	Print to any TCP/IP addressable printer or those connected to midrange, mainframe, NT, UNIX, and Macintosh systems as well as hardware print servers.
Ease of Use	Easy-to-use Wizard provides step-by-step instructions to easily configure virtual printer ports.
